

Anti-Plagiarism Plagiarism Checking System Terms of Use

Purpose and Application

Anti-Plagiarism is an electronic system for checking documents for plagiarism. It is used to check dissertations, publications, theses, term papers, and other documents.

Registration in the System

To access the Anti-Plagiarism system, you need to register on the website <http://ap.km.ua/>. The system can be used with two types of connections:

- **For personal use** (Appendix 2). This is suitable for checking documents for plagiarism without adding them to the main repository. Documents are checked anonymously in a personal account. If necessary, the check results can be sent to any email address or submitted to the main repository for the responsible person (Appendix 4).
- **For organizations** (education, science, etc.) (Appendix 3). This is suitable for educational, scientific, and other organizations to ensure compliance with the Ukrainian "Copyright and Related Rights Law" and the "Higher Education Law" in order to ensure the quality of educational activities and higher education, which involves maintaining academic integrity, including the creation and operation of an effective system to prevent and detect academic plagiarism.

Requirements for Electronic Documents

Plagiarism checks are conducted for electronic documents in the following formats: *.rtf (Rich Text Format), *.doc (Word 97 - Word 2003), *.docx (Word 2007), *.pdf (Portable Document Format), and drawings in *.dxf format. The document for checking should be complete, starting from the title page and including any appendices.

Criteria for Evaluating Plagiarism in Recommended Documents

- The maximum match with one work should not exceed 40%. In the case of typical documents (theses, term papers, reports, methodological materials, etc.), the maximum match with one work should not exceed 50%.
- The presence of errors in the work should not exceed 20%. For specialized terms that cannot be found in dictionaries, the error limit is 30%.
- The document for checking must contain at least 40,000 characters (300 lexemes).
- Documents that do not meet these requirements will be sent back for revision.

Installation (Update), Launch, and Use

The Anti-Plagiarism system can be used both through the web interface <http://ap.km.ua/> (<http://ap.khnu.km.ua/>) and in the desktop version.

It is recommended to use the web version <https://ap.km.ua/AntiPlagiarism>, which offers more functionality and is used both for personal use and for organizations (Appendices 1, 2, 3, 4). The desktop version is intended only for organizations and requires additional settings (Appendices 5, 6).

Appendix 1 - Web Version. Launch

On the website <http://ap.km.ua/> (<http://ap.khnu.km.ua/>), there is a link to the web version <https://ap.km.ua/AntiPlagiarism> (Fig. 1). In the upper left corner, there is a button to expand the main menu (Fig. 2).

A screenshot of a login form. It has a title "Login" at the top. Below the title are two input fields: "Login" and "Password". At the bottom of the form are two buttons: "Login" and "Registration".

Fig. 1

In the main menu, there are basic commands for working with documents.

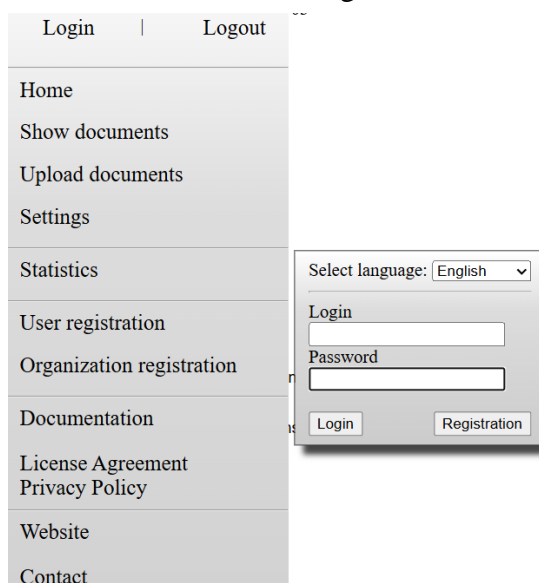

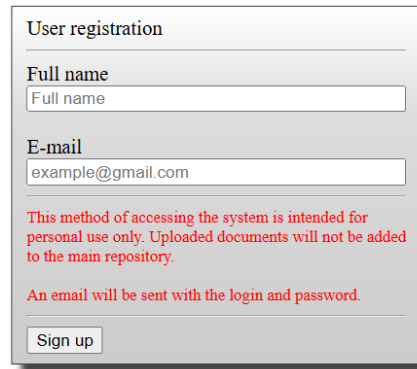

Fig. 2

Appendix 2 - Web Version. For Personal Use

To use the system for personal use, you must register as a user (Fig. 3). A letter with a login and password will be sent to the specified email. If the password is lost, simply provide the same email, and a new password will be sent.

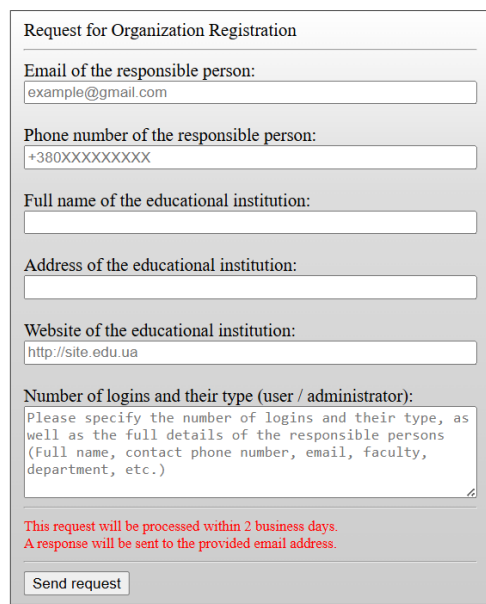

The image shows a web form titled "User registration". It contains the following fields and text:

- Full name:** A text input field with the placeholder text "Full name".
- E-mail:** A text input field with the placeholder text "example@gmail.com".
- Disclaimer:** A red text block stating: "This method of accessing the system is intended for personal use only. Uploaded documents will not be added to the main repository." Below it, another red text block says: "An email will be sent with the login and password."
- Sign up:** A button at the bottom of the form.

Fig. 3

Appendix 3 - Web Version. For Organizations (Education, Science, etc.)

Organizations must submit a registration request as an organization (Fig. 4).

The image shows a web form titled "Request for Organization Registration". It contains the following fields and text:

- Email of the responsible person:** A text input field with the placeholder text "example@gmail.com".
- Phone number of the responsible person:** A text input field with the placeholder text "+380XXXXXXXXXX".
- Full name of the educational institution:** A text input field.
- Address of the educational institution:** A text input field.
- Website of the educational institution:** A text input field with the placeholder text "http://site.edu.ua".
- Number of logins and their type (user / administrator):** A text area with the instruction: "Please specify the number of logins and their type, as well as the full details of the responsible persons (Full name, contact phone number, email, faculty, department, etc.)".
- Disclaimer:** A red text block stating: "This request will be processed within 2 business days. A response will be sent to the provided email address."
- Send request:** A button at the bottom of the form.

Fig. 4

Organizations can send the request to the email address info.antiplagiarism@gmail.com, providing the following information:

- Full name of the educational institution;
- Address of the educational institution;
- Website of the educational institution;
- Number of logins and their type (user/admin);
- For each login, provide the full details of the responsible person (name, contact phone, email, faculty, department, etc.).

This request will be processed within 2 working days, and a response will be sent to the email.

Appendix 4 - Web Version. Sending the Check Results by Email or to the Main Repository

To send the check results by email or to the main repository, call the table of document check results ("Show documents"), and in the last column "Share," for each document, there will be two buttons (Fig. 5):

Email - sends the selected report to an email (Fig. 6). If necessary, the report can be sent to any email, any number of times;

Repository - sends the selected document to the responsible person (Fig. 7). The document will be sent to the selected person and added to the main repository. If needed, repeat the submission to change the responsible person.

or text,	Number of lexemes	Date	Share
	632	2026-01-03	E-mail Repository

Appendix 5 - Desktop Version. Installation

To use the Anti-Plagiarism system in the desktop version, you need to have Java installed (<http://www.java.com>). It is recommended to install Java Runtime Environment version 8 (JRE8) or higher.

If the Anti-Plagiarism system is not yet installed, visit <http://ap.km.ua/> (<http://ap.khnu.km.ua/>) and run the appropriate version of Anti-Plagiarism. The client part of the system will be installed on your computer. To complete the installation, confirm that the Anti-Plagiarism system can be used from the website <http://ap.km.ua/> (or <http://ap.khnu.km.ua/>) in the Java Control Panel settings, under the "Security" tab, by adding the websites as shown (Fig. 8). Domains **antiplagiarism.pp.ua** and **infoscreens.keenetic.pro** are backup domains and should ideally be added as well. Also, direct connection with domains should be allowed in the network settings. VPNs should not be used.

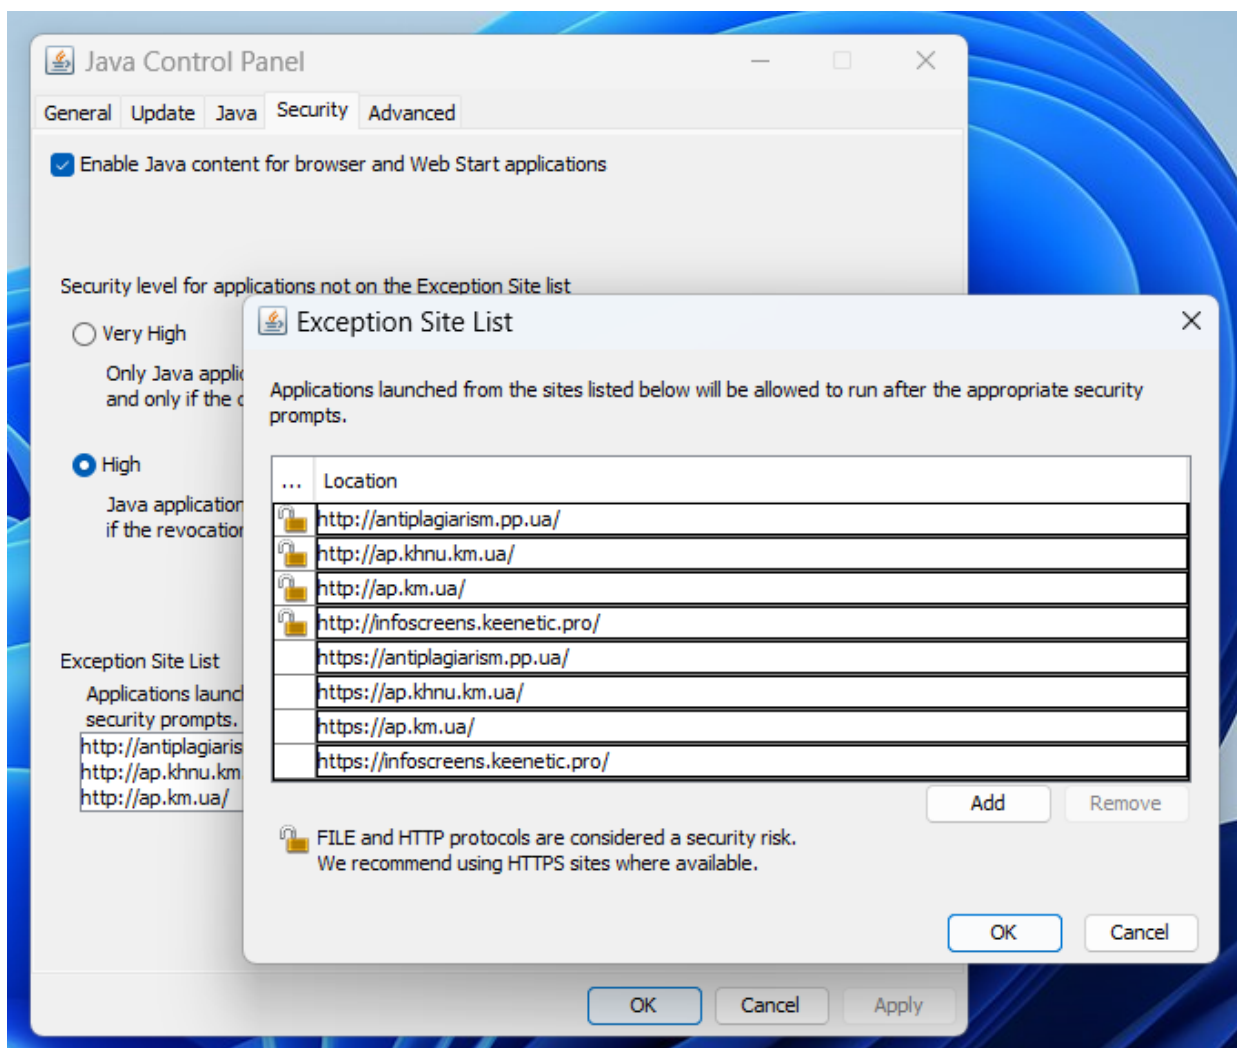

Fig. 8

After installation, a shortcut will appear on the desktop, which can be used to launch the Anti-Plagiarism system or you can launch it from the site mentioned above.

Note: The interface and report language will depend on the language and region settings in your operating system. If the necessary interface and report language cannot be set for these settings, English will be set as the default.

Appendix 6 - Desktop Version. Usage

For document checking, the work is submitted to the person responsible for inputting it into the Anti-Plagiarism system in electronic formats *.rtf (Rich Text Format), *.doc (Word 97 - Word 2003), *.docx (Word 2007), *.pdf (Portable Document Format), *.dxf (Drawing eXchange Format). The person responsible for inputting the document into the system checks it for plagiarism. After the plagiarism check, the responsible person issues the result. The plagiarism check result is added to the work.

Note: Once the document is entered for checking, it cannot be removed from the system!

Procedure for Checking Documents for Plagiarism

- 1 Launch the program using the Anti-Plagiarism shortcut on the desktop or from the website <http://ap.km.ua/>.
- 2 To log in to the program, you need to provide your login and password.
- 3 After logging into the system (Fig. 9), enter the data following these steps:

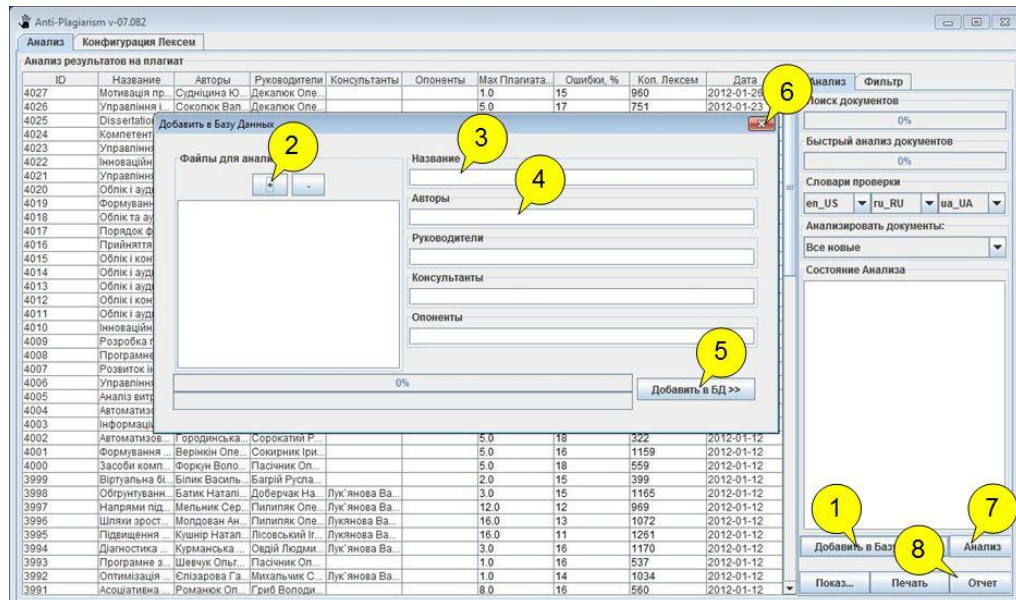

Fig. 9

- 1) A window will open for entering the document to be checked;
- 2) All files (formats *.rtf, *.doc, *.docx, *.pdf, *.dxf) related to the document are entered;
- 3) The document title is specified;
- 4) The author(s), supervisor(s), consultant(s), and opponent(s) are specified;
- 5) The document is added to the database;
- 6) Close the document entry window;
- 7) Analyze the selected document;
- 8) Detailed report of the selected document.
